VERTICAL MILLING MACHINES

5-axis
with fixed table

TRIMILL – your partner for PORTAL MILLING MACHINES

Our main mission is to develop and manufacture portal milling machines with an excellent proportion of QUALITY – OUTPUT – RELIABILITY – PRICE. An important part of our services comprises a well-elaborated system of the warranty and after-warranty service.

A wide selection of the TRIMILL machines contains vertical and horizontal portal milling machines, which are distinguished by high rigidity and accuracy and are intended for machining of pressing tools, moulds and precise workpieces in the single-piece production.

- Machine travels from (X,Y,Z) 1.100/1.000/700 mm to 13.500/4.500/1.800 mm
- Three-, five- and multi-axis design

Partnership with our customers is based on following pillars:

- Proficiency, experience, professionalism
- Customized solutions
- Development of new solutions
- Top service and immediate availability of spare parts

Figures and facts

- 12.900 m² of the production area and more than 130 specialists in development, design, assembly and technology
- Since 2000, when our family company was established, we have been operating in the markets all over the world
- 480 portal machining centres at 200 satisfied customers in 25 countries of the world

Our customers

- Tool factories
- Forging shops
- Automotive industry
- Aerospace industry
- Energy industry

The most frequently machined materials on our machines

- Tool steel
- Aluminium alloys
- Cast iron
- Structural materials

■ TRIMILL PRINCIPLE: BOX-IN-BOX and UHPC

The box-in-box is a unique system of closed construction of the cross-beam and cross-slide with internally positioned and guided ram unit (axes Y and Z). UHPC is a high strength concrete with excellent properties for vibration damping and thermal stability of machines.

THE ADVANTAGES OF TRIMILL PRINCIPLE:

- Consistent milling results thanks to stable thermo-symmetrical arrangement on linear guideways
- Always 4 guides of the cross and vertical support for the machine, preventing the occurrence of the so-called „banana effect“ which deforms/bends the vertical support of the machine
- Increased rigidity of the machine in the X axis by +60%, in the Y axis by +30% and in the Z axis by +90%

ADVANTAGES OF USING UHPC:

- The columns and longbeams of most TRIMILL machines are made of high-strength concrete (UHPC).
- Maximum vibration damping and extended tool life
- Low thermal conductivity and high heat capacity resulting in high thermal stability of the machines
- Compressive strength ≥ 150 Mpa \Rightarrow 6 times stronger than C20/25 concrete
- Production in our own concrete plant in TRIMILL, a.s.

TRIMILL uses UHPC with the most effective damping properties for all stationary machine components, which ultimately means better surface quality, higher precision and longer tool life.

Conventional portal milling machine

TRIMILL portal milling machine

TRIMILL VF 3016/3021

- 1 5-axis milling with single clamping using a two-axis milling head
- 2 T30C fork-type milling head for continuous milling with WEISS electric spindle (B- and C-axes)
- 3 Heidenhain TNC 640 HSCI CNC control system with a 19" colour display. Sliding door for access to the machine working area
- 4 Chip conveyors with an elevated chip outlet and a tool magazine

	X	×	Y	×	Z
VF 2216	2.200	×	1.600	×	1.200
VF 2221	2.200	×	2.100	×	1.200
VF 3016	3.000	×	1.600	×	1.200
VF 3021	3.000	×	2.100	×	1.200

TRIMILL VF 10035

- 1** Customized configuration of TRIMILL VF 10035 machine with X-axis travel of 10.000 mm
- 2** F4F fork-type milling head for continuous milling with WEISS electric spindle (B- and C-axes)
- 3** Special solution of TRIMILL machine with 2 gantries with 2 different U2C and F5F milling heads
- 4** A system of outer machine covers made of composite materials in a modern design (brushed aluminium)

TRIMILL VFC 3021

- Base plate can be anchored directly on a flat shop floor
- Cast-iron base plate (bed) with integrated clamping surface
- BOX-IN-BOX design of cross-beam
- Concrete sidewalls (UHPC concrete)
- Rapid feed rates of 40.000 mm/min
- Roughing and finishing operations in one set-up
- Stainless steel inside covers
- Very compact machine and accessories
- Machine can be optionally equipped with independent removable rotary table

	X	×	Y	×	Z
VFC 3021	3.000	×	2.100	×	1.200

Table

The fixed clamping plate made of cast iron	
Clamping surface	3.250 × 2.250 mm
Workpiece weight	max 7.000 kg/m ²
13 T-slots in transverse direction	18 mm H12
Pitch of T-slots	250 mm

Feed rate

Feed rates X, Y, Z	40.000 mm/min
Acceleration X, Y, Z	4 m/sec ²

Machine accuracy - VDI/DGQ 3441 standard

Positioning accuracy P (X,Y,Z)	max. 0,008 mm
Positioning scatter Ps (X,Y,Z)	max. 0,006 mm

Technical data

Machine weight approx.	92.000 kg
Total covered floor area	47,7 m ²

TRIMILL V 5528

- 1 Highly dynamic 5-axis machine, feed rates of 50,000 mm/min, acceleration of 4m/s^2
- 2 Large working area with a fixed work table, stainless steel covers and LED lighting
- 3 Coolant aerosol exhaust unit in the back of a machine together with chip conveyor outlets
- 4 Highly dynamic T21C CSC milling head with a cooled internal spindle shaft

	X	×	Y	×	Z
V 3528	3.500	×	2.800	×	1.250
